Niagara Networks' CloudRay - virtual TAP

Enables 100% visibility of virtual network traffic for superior monitoring capabilities in private, hybrid and public clouds

Overview

With increasing transition to data center and cloud based environments, IT teams find it challenging to use traditional monitoring tools for traffic visibility. Physical taps are unsuitable for virtual environments since they cannot monitor East-West and inter-VM traffic. Moreover, they cannot track VMs when moved across hypervisors. Niagara Networks' CloudRay-vTAP is a software solution that addresses these challenges, providing complete visibility of VM traffic in virtual computing environments, be it Private, Public or Hybrid clouds.

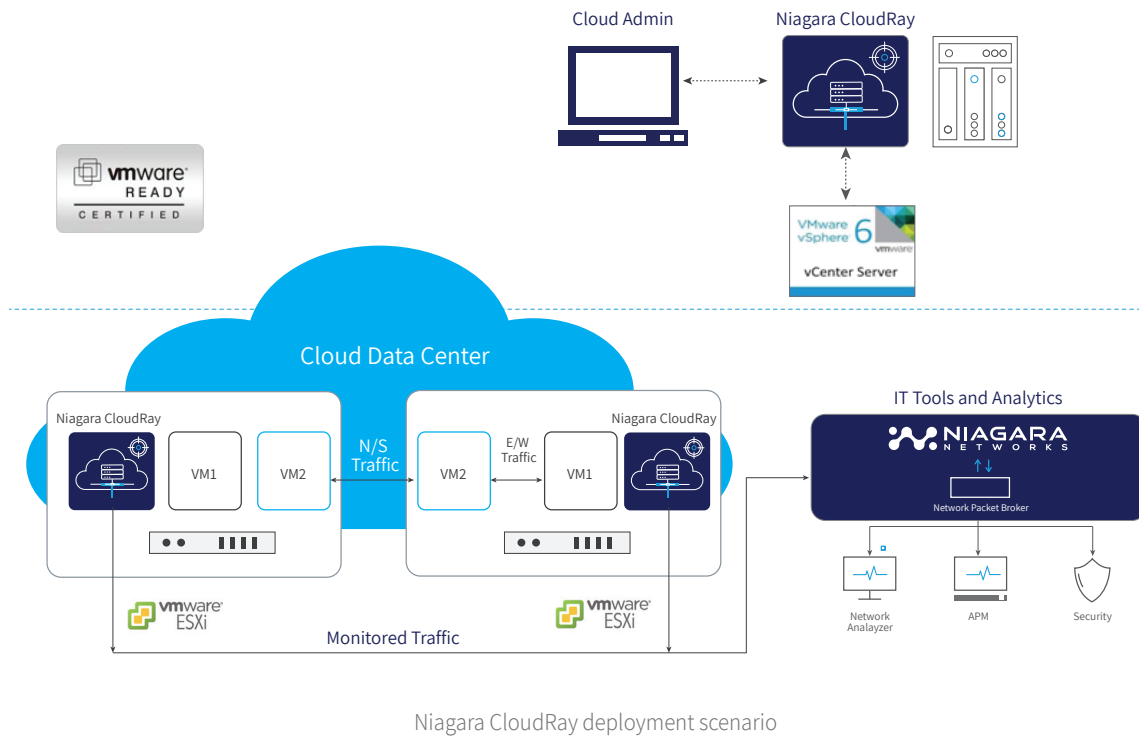

Key Benefits

- Enables Visibility-as-a-Service (VaaS)
- Private, Public, and Hybrid Cloud Visibility
- Tenant based tunnels, facilitating isolation, privacy and compliance
- Blind spot removal with total visibility of East-West, inter-VM and blade server mid-plane traffic
- Reduced network bandwidth with multi-layer filtering
- Centralised control with dashboard for orchestration and monitoring
- Enabling SLA compliance and trouble-shooting
- One touch installation enabling bulk deployments
- Complements existing physical taps

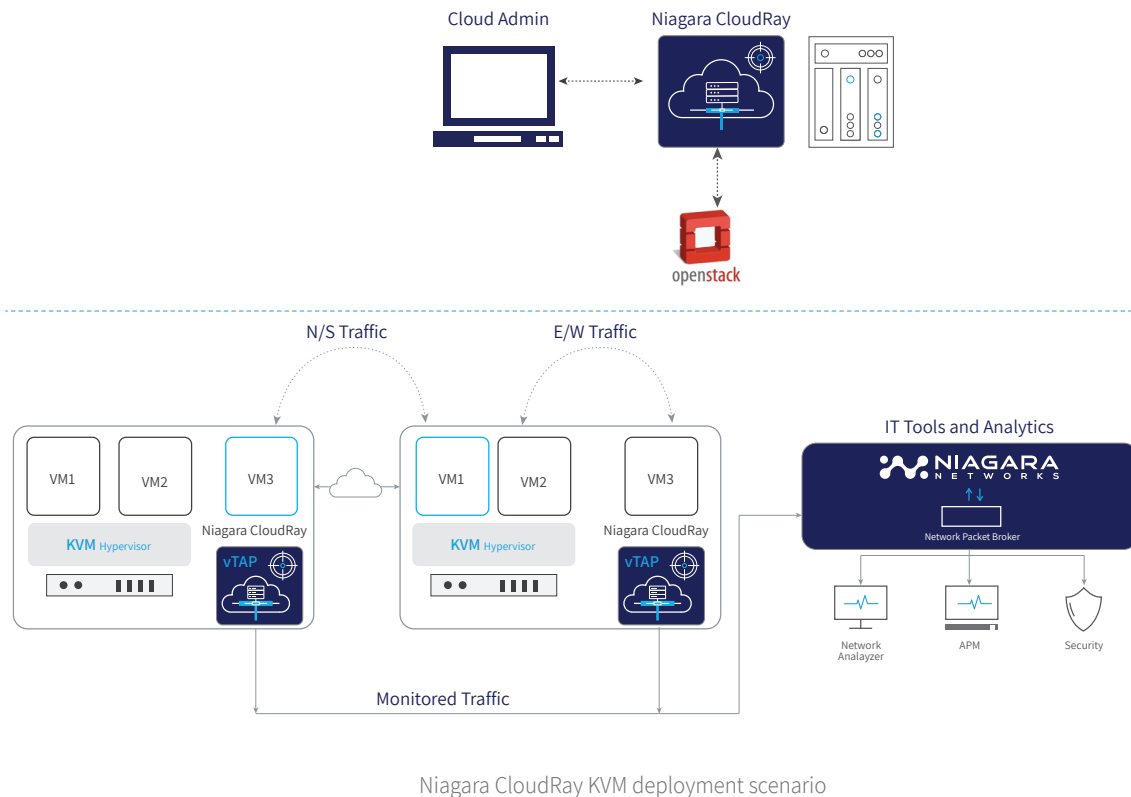

Key Features

- Enables 100% visibility of VMs traffic
- Supports VM traffic up to 10Gbs
- Supports VLAN, VXLAN and GRE tunnelling
- Advanced traffic filtering support
- Supports KVM, VMware ESXi, NSX and Microsoft Hyper-V
- Supports Amazon EC2
- Supports forwarding tapped traffic to multiple collectors
- Supports VMware vSS, vDS and OpenvSwitch (OVS)
- Packet slicing
- Single pane of glass based management

Private Cloud Visibility

Niagara Networks' CloudRay-vTAP can replicate all VM traffic without interrupting the regular VM traffic streams with very minimal processing overheads to hypervisor. The tapped traffic is sent to any monitoring tools of choice. Niagara Networks' CloudRay-vTAP can work in conjunction with Niagara's existing physical network TAP solutions, thus supports existing hybrid networking environments where both physical and virtual components co-exist.

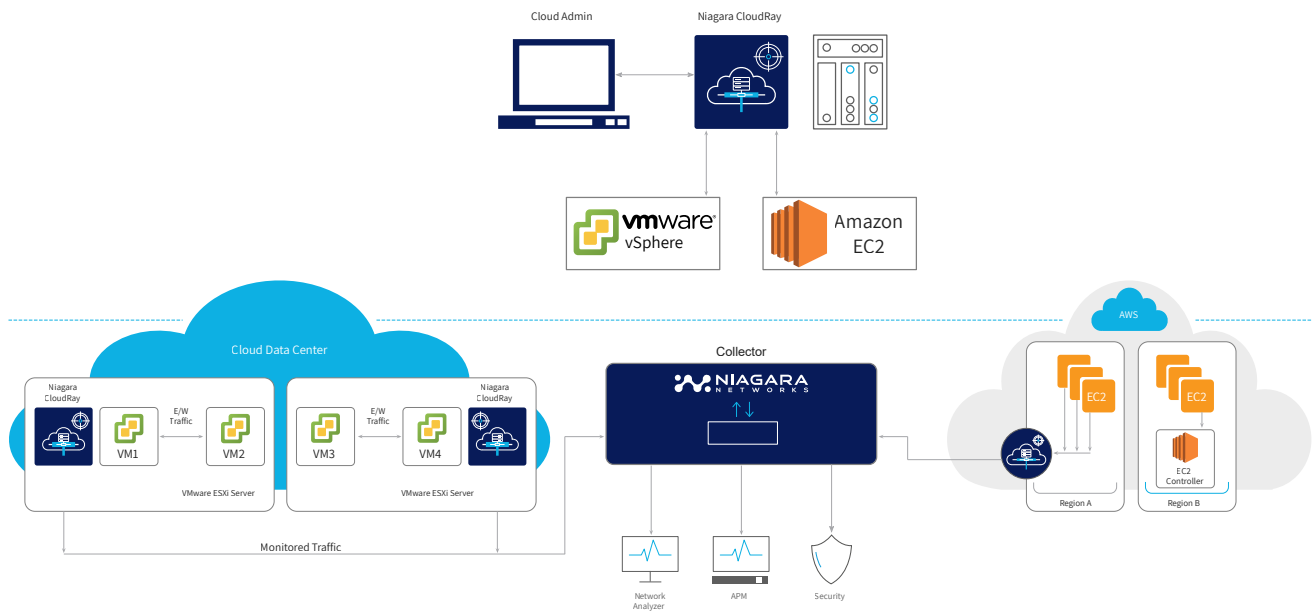

Public Cloud Visibility

Niagara Networks' CloudRay-vTAP can replicate all VM traffic without interrupting the regular VM traffic streams with very minimal processing overheads to EC2 instance. The tapped traffic is sent to any monitoring tools of choice. Niagara Networks' CloudRay-vTAP can work in conjunction with Niagara's existing physical network TAP solutions, thus supports existing hybrid networking environments where both physical and virtual components co-exist.

Hybrid Cloud Visibility

Niagara CloudRay Hybrid deployment scenario

Niagara Networks' CloudRay-vTAP can replicate all VM traffic without interrupting the regular VM traffic streams with very minimal processing overheads to hypervisor. The tapped traffic is sent to any monitoring tools of choice. Niagara Networks' CloudRay-vTAP can work in conjunction with Niagara's existing physical network TAP solutions thus supports existing hybrid networking environments where both physical and virtual components co-exist.

Specifications

| | |
|---------------|--|
| Hypervisor | <ul style="list-style-type: none">• VMware vSphere 6.0, 6.5 and 6.7 (ESXi vSS and vDS)• KVM with Openstack (Queens, Ocata, Newton)• KVM with RHOSP 10,13 |
| Controller VM | <ul style="list-style-type: none">• Two vCPU• 2GB RAM, 8GB virtual disk storage |
| Tap VM | <ul style="list-style-type: none">• One vCPU• 512MB to 2GB RAM, 1GB virtual disk storage• Maximum: 10 Network Adapters (Management port, Tunneling port, 8 monitoring ports) |

Ordering Details

| Part Number | Description |
|-----------------|---|
| CloudRay-10-S | 10 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware).Annual subscription. ¹ |
| CloudRay-20-S | 20 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware).Annual subscription. ¹ |
| CloudRay-50-S | 50 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware). Annual subscription. ¹ |
| CloudRay-100-S | 100 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware).Annual subscription. ¹ |
| CloudRay-250-S | 250 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware). Annual subscription. ¹ |
| CloudRay-1000-S | 1000 Agent pack. The license applies to the number of installed Agents, 1 license per host (Openstack, RHOPS, VMware). Annual subscription. ¹ |
| CloudRay-100-C | 100 docker agents pack. Agents are installed in the virtual workload (ex: AWS); one agent can monitor multiple vNIC in the workload. Annual subscription. ¹ |
| CloudRay-250-C | 250 docker agents pack. Agents are installed in the virtual workload (ex: AWS); one agent can monitor multiple vNIC in the workload. Annual subscription. ¹ |
| CloudRay-1000-C | 1000 docker agents pack. Agents are installed in the virtual workload (ex: AWS); one agent can monitor multiple vNIC in the workload. Annual subscription. ¹ |
| CloudRay-ORC | Orchestrator for CloudRay. CloudRay orchestrator can manage 3000 agents. Annual subscription. CloudRay agents sold separately. |

¹ Annual subscription. CloudRay-ORC required and sold separately.

About Niagara Networks

Niagara Networks provides high performance network visibility solutions for seamless administration of security solutions, performance management and network monitoring. Niagara Networks products provide advantages in terms of network operation expenses, downtime, and total cost of ownership. A former division of Interface Masters, Niagara Networks provides all the building blocks for an advanced Visibility Adaptation Layer at all data rates up to 100Gb, including TAPs, bypass elements, packet brokers and a unified management layer. Thanks to its integrated in-house capabilities and tailor-made development cycle, Niagara Networks is agile in responding to market trends and in meeting the customized needs of service providers, enterprises, data centers, and government agencies. For more information please visit us at www.niagaranetworks.com.
